Overview

The focus for the week was to work high trafficked areas and those with historical Curly-leaf Pondweed to include Schroon Lake Marina, Schroon Lake boat launch, Clark Island, and the Adirondack Lodge. Crew harvested both Eurasian Watermilfoil (EWM) and Curly-leaf Pondweed (CLPW) but noted growth was smaller than expected.

Sites harvested- 5, 17, 18, 19, 23, 25, 26

Total bag count for the week- 3.3 bags @ 82.5 lbs.

Monday- 6/25/18

Location: Sites 25, 26

Observations: Most of the day was spent working the Schroon Lake Marina (site 25). Most EWM was found in western section, single stemmed, average less than 1'. Site 25 contained multi-stems (approx. 2-5') with small satellite plants in their proximity.

Harvest Data: 1 bag @ 25 lbs.

Tuesday- 6/26/18

Location: Sites 18, 23, 25

Observations: Completed site 25 working out to channel finding some EWM and a small area of CLPW. Schroon Lake boat launch (site 23) was swam; crew did not locate plants within the docks but noted an area outside of swimming area contained mature EWM and CLPW with CLPW in small clusters. Site 18 had limited 6' multi-stem EWM and majority small single stemmed plants.

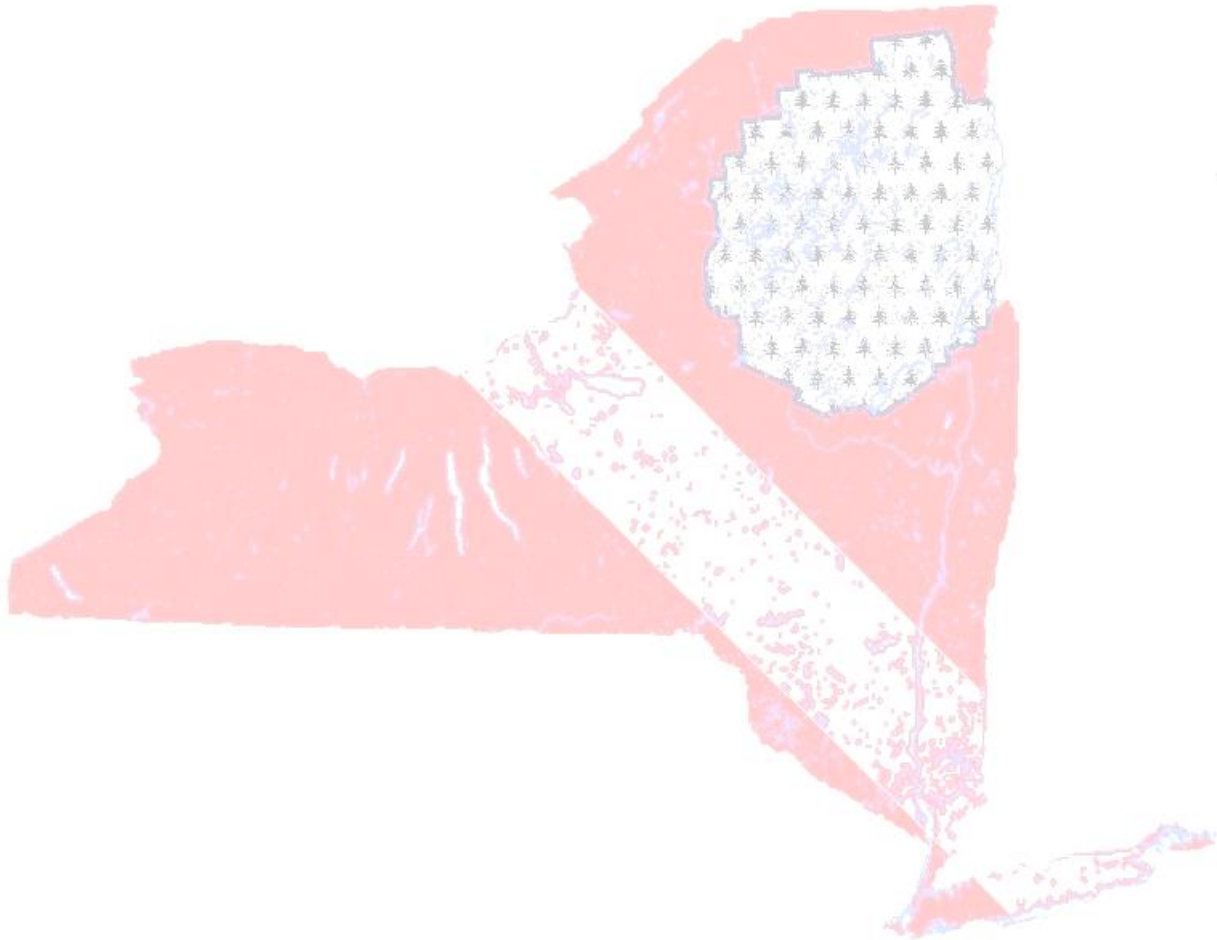

Harvest Data: ¾ bag @ 18.8 lbs.

Wednesday- 6/27/18

Location: Sites 18, 19

Observations: Completed site 18. Site 19 crew found 3 small CLPW and small clusters of EWM throughout site approx. 6-8' with clusters in cove grown to surface.

Harvest Data: 1 bag @ 25 lbs.

Thursday- 6/28/18**Location:** Site 5, 17**Observations:** Began at ADK Lodge (site 5) finding single and multi-stemmed EWM sporadic throughout area averaging less than 2'. Worked site 17 finding both EWM and CLPW towards north section of site. EWM found was multi-stemmed (6-8') with single stemmed (1-4') throughout area.**Harvest Data:** ½ bag @ 12.5 lbs.
